

Secure IT Asset Disposition

Create a revenue stream selling your obsolete IT hardware

ON-LINE has the resources and expertise to help your company create a new revenue stream by selling your decommissioned or obsolete IT hardware. Provided there is *still* value, we will make you an offer, arrange secure data eradication, transportation logistics and buy-back your equipment, reducing the environmental impact of landfill disposal.

Repurposing

Repurposing allows for complete and secure data eradication without destroying the storage device. Clients can reuse eradicated drives and other storage media devices to lengthen the investment life cycle and cut costs from the purchase of new.

All data eradication is done to Min Spec DOD5022.22M and Nist 800-88 Standards with full Serial number reporting and a Certificate of Data Destruction provided. Our portable test equipment allows the flexibility to perform data eradication at client locations. Proper data erasure allows you to maintain compliance with Sarbanes-Oxley, HIPAA (Health Insurance Portability and Accountability Act), GLBA (Gramm-Leach-Bliley Act), and other local and federal regulations .

Complete Data Compliance Services

Shred & Recycle

We offer a menu of *At-Your-Site* destruction options that empower our customers to meet security compliance objectives while protecting the environment from hazardous material disposal.

We manage the reuse or secure disposal of redundant IT equipment in an environmentally responsible way, maintaining 0% waste to landfill for end-of-life assets.

Why choose ON-LINE ?

- Single source for IT logistical asset disposition and data destruction
- Prompt payment from a company that has been in business since 1987
- At-your-site tape, hard drive & other data storage device destruction services
- Data eradication done to Min Spec DOD5022.22M and Nist 800-88 Standards

“We manage the reuse or safe disposal of redundant IT equipment in an environmentally responsible way, maintaining 0% waste to landfill for end-of-life assets”

Asset Disposition logistics

Logistics Network

Our logistics network solves one of the most troubling problems for clients, secure, reliable transportation. IT assets inherently pose a unique challenge because of their high value and risk of data breach. *ON-LINE's logistics network offers a secure chain of custody.*

National Reach

We utilize logistics centers throughout the US assuring close proximity to every metropolitan area. Our goal is to always ensure secure handling, dependability, and professional service by industry trained personnel.

End-to-End Chain of Custody

For customers demanding a more transparent method of tracking their assets in transit we offer end-to-end chain of custody. As an additional service option, we assign a logistics security specialist to travel end-to-end with the asset's. Throughout the entire transportation process, those assets remain in our possession until they arrive at one of our secured processing centers for recycling, repurposing or complete destruction. The knowledge of vehicle location at any time, is made available via GPS.

Secure end-to-end chain of custody is an important step in assuring compliance with data security and environmental management laws.

Want To Buy Or Want To Sell?

Through our Global Partner Network, we have access to over \$100 million dollars of new, repurposed and factory-certified inventory. Our customer support specialists can quickly help to find you the right solution, at the right price, and get it to you anywhere in the world, saving you budget money and valuable time.

Contact us today!

Please call or email one of our specialists with a list or the details of your needs. We will get back to you promptly and will work hard to build your trust as we've done so with customers, since 1987.
