

PRESS RELEASE

ON-LINE Computer Products Hires New Leadership to its Professional Services Division

Company appoints Ken Holland & George Maroulakos to support services growth for ON-LINE

Norwood, Massachusetts — January 19th, 2016— ON-LINE Computer Products, a global leader in delivering innovative technology products, services, and solutions, announced today that it has appointed **Ken Holland** and **George Maroulakos** to the role of Senior Vice President - Professional Services. In this capacity, Holland and Maroulakos will be responsible for the delivery of technology services and solutions to ON-LINE's existing and prospective customer base.

"We continue to expand upon our founding core business capabilities of delivering cutting-edge technology support products, services and solutions to the marketplace. The addition of Ken Holland and George Maroulakos further enhances our ability to provide a complete and holistic experience to address complex customer initiatives," said Al Butters, President, ON-LINE Computer Products. "The practical industry knowledge, business acumen, and technology leadership that Ken and George bring to the table will be a tremendous asset to the ON-LINE family, as well as to our customers".

With more than 40 years of combined professional experience in Global Outsourcing, Managed Services, Cloud Implementation Services and Application Development, Holland & Maroulakos offer a wide range of expertise across a variety of technologies and industries.

Ken's knowledge is a derivative of his strategic consulting and leadership experience, having held roles with major technology companies across several different industries. He had also led global infrastructure management teams providing outsourced service requirements worldwide. Adding to Holland's resume is his experience in construction practices for mission critical facilities. Ken understands the intricate nature of both renovating, and building new world-class enterprise centers, and has a proven track record of delivering complex data center retrofits without service interruption.

George was formerly the US Practice Director for an international services firm specializing in technology services and data center migrations. Previously, he served as vice president, Advanced Services – ITO for a leading telecommunications and cloud services organization. In that capacity, he established key executive relationships with customers and partners to ensure technology services were delivered with high value and strategic importance.

Holland remarked, "The technology needs of today's customers require a complete perspective of the product landscape, as well as the consultative service support to maximize value from those investments. With ON-LINE Professional Services, we can now offer end-to-end solutions unmatched by our competitors and always at a savings to our customers."

"ON-LINE Computer Products has been a well-respected company with impressive customer relationships and steady growth throughout its 28 year history. I'm excited to expand the professional services capabilities into the portfolio of products and services that have been the foundation for the long term success of the company" said Maroulakos.

About ON-LINE Computer Products

Founded in 1987, ON-LINE Computer Products Inc. is a woman owned, WBENC Certified Business offering "Technology Support Products, Services and Solutions". Different from an OEM or a sole source provider, "ON-LINE" and its affiliated companies offer technologies and services that are vendor agnostic and designed to reduce costs and improve operational efficiencies. ON-LINE Corporate Headquarters is located in Norwood, Massachusetts with additional offices located throughout the United States.
